PORTFOLIO INTELLIGENCE

Cumulative Portfolio Analytics

Explore the portfolio from high-level comparison to detailed website, domain, content and analytics information. The Portfolio Rating is a comparative index, not an independent valuation or guarantee of future revenue.

On this page

Portfolio Ranking | Portfolio Market Overview | Websites in the Portfolio | Portfolio Content & Site Inventory | Domain Portfolio | AI Portfolio Insight | Detailed Analytics

1 · COMPARE

Portfolio Ranking

A comparative 1–10 portfolio rating based on the available domain, traffic, search, content, engagement and technical signals.

Portfolio Website Ranking

Portfolio ranking data needs to be regenerated under the property/domain verification checks. An administrator can generate it below. Until then, older stored traffic figures are hidden to avoid displaying potentially misattributed values.

2 · UNDERSTAND

Portfolio Market Overview

A consolidated view of the portfolio's measured audience and website performance.

Select and listen

How can I help you

Market Analytics Overview **GA4 traffic totals use adjusted estimates where available; raw GA4 values are used if adjustment data is unavailable. Search Console metrics are unchanged.**

289	452	7
Adjusted Users (estimated; unadjusted fallback if unavailable)	Adjusted Sessions (estimated; unadjusted fallback if unavailable)	Properties Tracked

Property Rankings (30d)

Users, sessions and growth are traffic-quality-adjusted estimates where available; if the adjustment cannot be calculated, the value falls back to original GA4 data. Search Console clicks, impressions and keywords are unadjusted search metrics.

Sort By:

> **AI Portfolio Ranking:** a 1–10 buyer-comparison score that combines domain, traffic, SEO, content, engagement and technical signals. The highest-rated site is 10/10. The numerical score is calculated from measured data rather than being arbitrarily assigned by AI.

Global Audience & Market Geography (30d; original GA4, unadjusted)

Original country-level active users from GA4; this geography visualization is unadjusted and is not the same as the strict or expanded traffic-quality estimates shown above. Counts are summed across properties and may include the same person on more than one site.

Last 30 days (/public-analytics-reports/?market_days=30#flip-market-geography)

Global visitor clusters

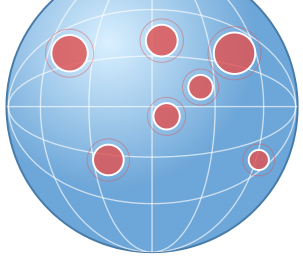

Regional audience

Asia	3,854 users · 73.4%

Select and listen

How can I help you

Marker size indicates relative activity by broad region. Focus or hover over a marker for its total.

Europe	218 users · 4.2%
North America	868 users · 16.5%
South America	157 users · 3.0%
Middle East	25 users · 0.5%
Africa	43 users · 0.8%
Oceania	6 users · 0.1%

Top Countries and Cities — Original vs Adjusted Estimates

Verified geography counts only sessions with evidence of real readers; the not-counted view shows where unverified and excluded sessions came from. Both are estimates, not verified bot detection. City totals may include the same visitor appearing in more than one city. Shares are calculated within each displayed geography list.

Original GA4 data (unadjusted)

Reported geography; no traffic adjustment.
